

Master Sustainable Development and Quality Management

Intitulé officiel : Master Droit, économie et gestion, mention gestion de l'environnement parcours Sustainable Development and Quality Management

Présentation

Publics / conditions d'accès

This degree is part of our programs "**Master in Management**" (MIM). The Master in Management (MIM) is designed around the framework of:

- an **Orientation week** with intercultural integration and team building activities.
- **Master 1 (Year 1)** with core curriculum of Management. The Master 1 helps students to understand the rules and practices of an organization as well as the different modalities of its management. The learning outcomes of the first year are then applied in a team-based experience that enables students to learn by action in the real work world.
- **Master 2 (Year 2)** with Transversal management modules, Major - Specialization modules, Minor - Elective blocks and Supporting modules:
 - In order to successfully be an entrepreneur or join an organization, Master in Management students need to develop their own skills, achieve the principles and tools of project, quality, intercommunication, etc. These skills, tools and principles will help optimize the resources in this transversal management mode. Therefore, the MIM has developed transversal management modules that are indispensable for all Management students, whatever specialization they will follow.
 - Major - Specialization provides students critical thinking on specific expertise that they will follow and develop their professional outlooks. The stakes are detailed for each master (International Business & Corporate Development and Project Management & Business Engineering).
 - Students are invited to choose one block of elective courses as a minor to their specialization. The combination of majors and minors will help students enhance different competences and practical skills in fast growing business areas and highly demanding professions, including e-Business, International Management, Sustainable Development and Business Development (entrepreneurship).
- an **Internship** from 3 to 6 months in the Master 2 year. The internship will complete the Master curriculum and offer an "action learning" opportunity.

The Master Diploma is delivered under the control of the French Ministry of Higher Education.

Admission access:

Students could apply from Master 1 (for the 2-year program) or directly to Master 2 (for the final-year program) upon the field of Bachelor degree and the Master application form.

Objectifs

The main objectives of this minor in sustainable development and quality management are:

- To integrate transversal approach of sustainability in any corporate project
- To develop an understanding of the environmental issues and risks
- To become a leading business advocate on sustainable development
- To comprehend the business contribution to sustainable development solutions and practices
- To understand and apply Sustainable Development governance and social responsibility principles

Modalités de validation

Students must obtain all the credit requirements in the curriculum.

Compétences

This Minor in Sustainable Development and Quality Management considers not only the standards in these different fields but also the new trends in business ethics and sustainability in the limits of the planet.

Furthermore, thanks to the complete curriculum design of the **Master in Management (MIM)** concept, this master degree also enables students to:

- Master the principles and tools for managers of business units with up-to-date management topics in the real business environment with **Core curriculum (M1)** and **Transversal modules (M2)**;
- Build a concrete view of the working environment, especially in the specific European business framework with **Supporting modules (M2)**;
- Represent the management of focused business activities as an action which includes four complementary elements: functional management, time

management, organizational management, daily management with **Specialization modules** and **Minor blocks (M2)** such as *Business Development, Sustainable Development, International Management and e-Business*;

- Master and experience the strategic principles and tools towards high performance and innovations with Group projects and **Internships (M2)**;
- Achieve **intercultural and additional competences** relying on students' original degree in sciences or engineering or students' intercultural experience and engagement.
