UAMG16 - Professional Experience and Master Thesis

Présentation

Programme

Contenu

To validate UAMG0C, students must:

- pass all classes of Master 2
- have at least 3 months of new professional activity, which could be either an internship or a job
- write a Master thesis
- pass the master thesis and its oral defense

The Master's thesis analyzes a managerial issue related to the content of the Master's courses.

The student will benefit from double support:

On the one hand, the student benefits from a series of methodological workshops:

- resources to formulate a managerial issue
- resources to do a literature review (research and documentation methodology) and a bibliography
- guidelines on the usage of artificial intelligence when writing the thesis
- resources to analyze and interpret data (qualitative/quantitative methods of collection and analysis)
- resources to develop the thesis and prepare the oral defense

On the second hand, the student is supervised in parallel by a tutor who guides him/her throughout the Master thesis and the methodological workshops, to ensure the student's progress in a reactive and proactive manner.
