

US173K - Environment International Law and Institutions

Présentation

Prérequis

Master in Management MIM M2 electives: Sustainable Development & Global Quality Management

Objectifs pédagogiques

The module intends to familiarize students with recent developments in international sustainable development law, a field emerging at the intersection between international economic, environmental, and social law.

It aspires to give them a long-awaited coherent approach which can assist to address conflicts and overlaps between international economic, environmental, and social regimes.

This course intends to provide participants with the basics of an understanding of principles, tools and main elements to apply in their own business environment.

Compétences

At the end of the lectures, the student should be able:

- to apprehend the legal aspects of sustainable development, in terms of norms, treaties, bilateral agreements, and any other mechanism for cooperation
- to show a more comprehensive approach for understanding conflict overlaps between international economic, environmental and social regimes
- to raise reflectivity on a new international architecture of sustainable development governance
