

USEEK6 - Radiocommunications (2)

Présentation

Prérequis

Students must have good skills in telecommunications.

Objectifs pédagogiques

This course is a project, with a 3 or 4 months duration, on an advanced topic in telecommunications.

Compétences

Students become familiar with an advanced topic borrowed from the telecommunications domain.

Programme

Contenu

Students have to analyze a topic from conference and journal papers sent to them. Then they have to write a report about the topic. A defense or presentation to a jury could be organized.

Modalités de validation

- Mémoire

Description des modalités de validation

The students must have a note greater than or equal to 10/20.
