

USM30A - Added Value Creation Process

Présentation

Prérequis

Master in Management MIM M2 group:

Project Management & Business Engineering

Objectifs pédagogiques

The lectures present Added Value Creation Process as the way of achieving a quantum leap in performance. It brings a new approach of understanding growth from an operational and concrete standpoint.

The lectures go through the basic knowledge to understand about company's processes. Thus, the understanding of Added Value Creation Process will integrate a broader analysis and a more comprehensive definition of interrelated business processes.

The lectures provide the blueprint for implementation of business processes, which becomes a necessity, and a priority in strategic business management.

Learning objectives and takeaways:

- To make understand what a process is.
- To learn how to create company's process to achieve a quantum leap in performance.
- To appropriate a way of thinking that allows to transform issues in processed solutions.
- To develop the soft skills necessary to step back and think to how activities are processed.
